

2-RAH-5 ROLLER SUPPORT

The quality materials used in MIRO supports set us apart from the competition

Metal parts are made from
**HOT-DIP GALVANIZED
& STAINLESS STEEL**

304 stainless steel rod paired with hot-dip galvanized hardware will ensure rust won't stop you from making adjustments years down the road.

All plastic parts are made from
HIGH-STRENGTH POLYCARBONATE

Not all plastics are created equal. When it comes to durability, polycarbonate is king. It has much higher impact strength and temperature resistance than alternative plastics. We add carbon black for maximum UV resistance. It's also 100% recycled.

ACCESSORIES

2" Aluminum Pipe Guide

7X10" Rubber Pad

KEY INFORMATION

- **Made in the USA**
- Designed for pipes up to 2" diameter
- Adjustable from 3-5/8" to 5" height
- Max Load: 140 lbs (3.0 PSI)
- Unit Weight: 1.35 lbs
- 12 per case, 17 lbs case weight
- 3/8" All-Thread Type 304 Stainless Steel
- All other metal parts are hot-dip galvanized steel.
- Axle, Roller, and Collar: **100% Recycled Polycarbonate**
