

PILLOW BLOCK AND ROLLER SUPPORTS FOR GAS AND MECHANICAL PIPING

Unique design with a polycarbonate cradle or roller that accommodates thermal expansion and contraction thus preventing damage to the roof membrane. With different conditions on each rooftop, Dynamic Supports make it easy to adjust and adapt in every situation.

STRUT SUPPORTS FOR CONDUIT AND CONDENSATE

Built for piping such as conduit and condensate. These models come in widths from 12" to 48" and heights up to 18". Elevate Supports are manufactured with only hot-dip galvanized or stainless steel metal parts. Coupled with the polycarbonate base, Elevate Supports are extremely durable and made to withstand rooftop elements.

CUSTOM DUCT AND HANGER SUPPORTS

Superior "H" style supports designed to carry bare or insulated pipe, all sizes of duct, and cable trays while dispersing load properly on the roof. All supports are shipped pre-assembled and are ready for a quick installation.

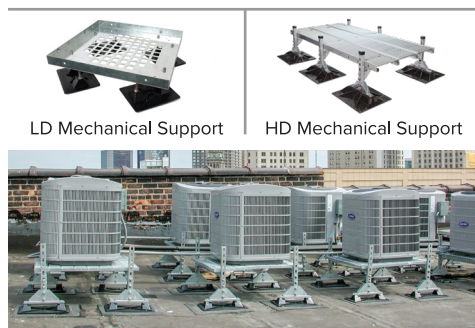

CUSTOM SEISMIC AND WIND SUPPORTS

The seismic & wind supports are engineered to meet the code requirements for each unique application. All parts are built to spec and are finished in either hot dip galvanized or stainless steel. All supports have both horizontal and vertical adjustability.

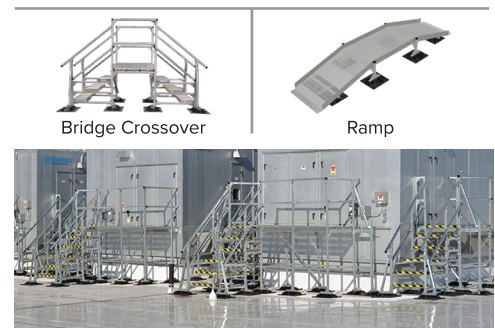

MECHANICAL EQUIPMENT SUPPORTS

Light Duty and Heavy Duty Mechanical Supports are manufactured to maximize protection to the roof membrane. They are height adjustable and designed to maximize air ventilation for greater unit efficiency.

SUREFOOT ACCESS BRIDGE CROSSOVERS, WALKWAYS, SERVICE PLATFORMS AND RAMPS

Unique design with a polycarbonate cradle or roller that accommodates thermal expansion and contraction thus preventing damage to the roof membrane. With different conditions on each rooftop, Dynamic Supports make it easy to adjust and adapt in every situation.

YOUR ONE-STOP ROOFTOP SUPPORT SOLUTION

We spend all day thinking about rooftop supports so you don't have to. Give us a call and we'll help you find the right solution for your project.
