

POE Water Purification System

Bottled water quality from every tap.
More efficient mechanical systems.
Happy tenants and guests.

Protecting the health and safety of tenants and guests is the #1 job for any building owner and operator. Adding a Triple Clear System at point-of-entry is the most cost-effective, energy-efficient, environmentally-friendly solution.

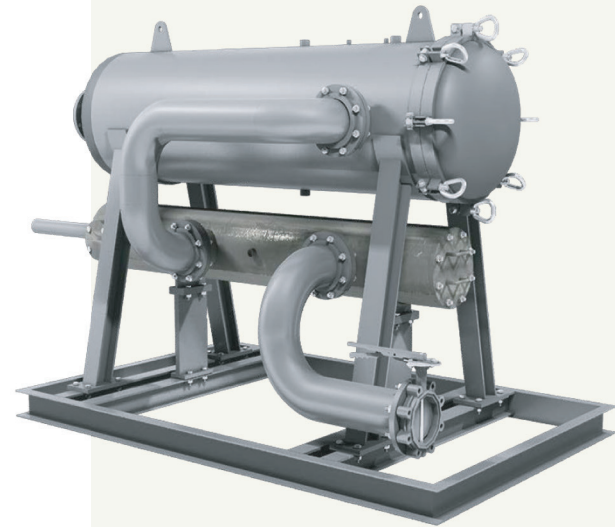

Using no chemicals, almost no power, and 99% less water than RO systems, Triple Clear Solutions removes system-clogging grit, potentially dangerous micro biologicals, heavy metals like lead, and cellular debris that causes efficiency-sapping biofilms.

As recent headlines have reminded us, just because water leaves the treatment plant clean, doesn't mean it reaches your building that way!

Miles of pipe contain leaks, debris, lead, biofilm, rust and other contaminants that can degrade water quality before it enters your plumbing system

Don't take chances with your water.
Upgrade to Triple Clear today!

400gpm, 3-Stage, POE System
Horizontal Skid Mounted

- Stage 1: Grit & Particulate to 5um
- Stage 2: Microbiologicals, Heavy metals, Colloids, Cellular debris, Trace pharmaceuticals & more
- Stage 3: Taste and Odor

Features:

- Pre-Packaged POE solutions from 50gpm to 400gpm. Custom 1200gpm.
- Remove particulate matter down to 0.001um equivalent.
- Remove > 99.99% of viruses, bacteria, and cyst.
- Remove > 98% of lead.
- Remove > 99.99% of cellular debris that causes biofilms.
- Bottled-water-quality taste, odor, and levels from every tap.
- Requires no chemicals.
- Uses almost no electricity.
- Low maintenance
- Pressure drop as low as 2psid (12psid max recommended)
