

### Introducing Firewall Filtration™

#### The Power of POE Filtration

Municipal water distribution systems are aging. In fact, by the time it makes it to your building, water can be contaminated with dirt, rust, lead, biofilm, bacteria, viruses, parasites and oxidized metals like iron.

Put a firewall between your water supply and your valuable building with Triple Clear's Firewall Filtration System. This state-of-the-art solution prevents potentially damaging contaminants from entering your building, where they can clog your mechanical system, dilute equipment efficiency, and worst of all, make people sick.

### How Firewall Filtration Impacts the Quality of Your Building's Water Supply

<b>KEY:</b>  Potable Water	 Improves occupant satisfaction; delivers clean, clear drinking water	 Maintains peak efficiency; Reduces scale, grit & bio scale	 Reduces greenhouse gas emissions; Promotes environmental stewardship
 HVAC Water  Closed Loop HVAC	 Reduces maintenance, breakdowns & downtime	 Reduces biohazard, liability & publicity risks	 Reduces costs
 Prevents contaminated water from entering your building
